

Marquette Law School Supreme Court Survey Crosstabs

Abstract

This file contains crosstabulations of each non-demographic question with variables for sex, age, education, income, party identification with leaning independents, party identification without leaners, marital status, race and ethnicity, religious service attendance, religious affiliation, born again or evangelical identification, and political ideology. To calculate the numeric size of a response, multiply the percent by the subsample size, indicated in the “n” column. **Statistics for very small samples have very high margins of error and should be disregarded.**

Q34. In February 2016, following the death of Justice Antonin Scalia, Republican Senate Majority Leader Mitch McConnell announced that the Senate would not consider or hold hearings on any nominee President Obama might name during an election year. In March, Obama nominated Judge Merrick Garland to the Supreme Court. The Senate did not hold a hearing and the nomination expired in January 2017. Was not holding a hearing on the nomination the right thing or the wrong thing to do?
